EXECUTIVE CHAIRMAN'S STATEMENT

On behalf of the Board of Directors, I have the pleasure of presenting the Annual Report and Financial Statements of Brite-Tech Berhad Group for the financial year ending 31 December 2002.

FINANCIAL REVIEW

For the financial year ended 31 December 2002, the Group registered a pre-tax profit of RM4.29 million as compared to the previous year's pre-tax profit of RM6.04 million while the Group's turnover decreased from RM15.553 million in 2001 to RM12.971 million in 2002. The decrease in performance was mainly due to the deferment of projects as prospective clients and businesses remain cautious in their spending as a result of worries of the threat of war and of the global economic uncertainties.

DIVIDENDS

As a recognition of your continuous support, the Board is pleased to recommend a final gross dividend of 1.11 sen per share less income tax for approval at the forthcoming Annual General Meeting.

PROSPECTS

The year ahead remains a very challenging year due to the uncertain global economy and difficult business conditions. The performance of the Group for the next year is likely to be weaker in view of the continued slowing down of the global economy as well as subdued recovery in the general industries, in particular the semiconductor industry. The Group will concentrate on its core competencies as well as to look into related areas of business.

ACKNOWLEDGEMENT AND APPRECIATION

On behalf of the Board of Directors, I would like to take this opportunity to express our sincere appreciation to the management and staff for their hard work and contribution to the Group; our shareholders, all regulatory authorities, bankers, customers and business associates for their co-operation and support. Finally, I would like to express my sincere appreciation and gratitude to my fellow directors for their invaluable contributions and support.

The financial statements are presented in Ringgit Malaysia.

2. PRINCIPAL ACTIVITIES

The principal activity of the Company is to carry on the business of holding company. The principal activities of the subsidiary companies are described in Note 7 to the financial statements.

3. BASIS OF PREPARATION

The financial statements of the Group and of the Company as set out on pages 25 to 55 have been prepared in accordance with applicable approved accounting standards in Malaysia and provisions of the Companies Act, 1965.

The Group and the Company have also complied with the accounting standard MASB 25 on treatment of Income Taxes issued by the Malaysian Accounting Standards Board before its effective date.

4. FINANCIAL RISK MANAGEMENT POLICIES

The Group's financial risk management policy seeks to ensure that adequate financial resources are available for the development of the Group's businesses whilst managing its risks. The Group operates within clearly defined guidelines that are approved by the Board and the Group's policy is not to engage in speculative transactions.

The main areas of financial risks faced by the Group and the policy for managing each of these risks are set out as follows:-

a) Foreign Currency Risk

The Group incur foreign currency risk on the sales, purchases and investments that are denominated in currencies other than Ringgit Malaysia. The currencies giving rise to this risk is primarily the US dollars and Euro Currency.

Given the government's peg at present, no hedging of these exposures by purchasing forward currency contracts was done. The Group ensure that net exposure to foreign currency risk is kept to an acceptable level by buying or selling foreign currencies at spot rates where necessary to address short term imbalances.

b) Interest Rate Risk

The Group obtains additional financing through bank borrowings and leasing arrangements. The Group's policy is to borrow principally on the floating rate basis but to retain a proportion of fixed rate debt. The objectives for the mix between fixed and floating rate borrowings are set to reduce the impact of an upward change in interest rates while enabling benefits to be enjoyed if interest rates fall.

NOTES TO THE FINANCIAL STATEMENTS (Cont'd)

FOR THE YEAR ENDED 31 DECEMBER 2002

c) Credit Risk

The carrying amount of trade and other receivables, and cash deposits represent the Group's maximum exposure to credit risk. The credit risk is controlled by the application of credit approvals, limits and monitoring procedures. This is done through reference to published credit ratings by prime financial institutions. In the absence of published ratings, an internal credit review is conducted if the credit risk is material.

Cash is deposited with financial institutions with good credit ratings.

At the balance sheet date, there were no significant concentrations of credit risks.

d) Liquidity and Cash Flow Risks

The Group seeks to achieve a balance between certainty of funding even in difficult times for the markets or the Group and flexible, cost-effective borrowing structure. This is to ensure that at the minimum, all projected net borrowing needs are covered by committed facilities. Also, the objective for debt maturity is to ensure that the amount of debt maturing in any one year is not beyond the Group's means to repay and refinance.

5. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the financial statements.

a) Basis of Accounting

- (i) The financial statements of the Group and of the Company have been prepared under the historical cost convention (as modified by the revaluation of certain freehold land and buildings and leasehold land), unless otherwise indicated in this summary of significant accounting policies.
- (ii) The preparation of the financial statements in conformity with the applicable approved accounting standards and the provisions of the Companies Act, 1965 require the Directors to make estimates and assumptions that may affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported financial period. Actual results could differ from those estimates.

b) Basis of Consolidation

The Group financial statements consolidate the audited financial statements of the Company and all of its subsidiary companies which have been prepared in accordance with the Group's accounting policies.

The subsidiary companies are consolidated using the acquisition method. Under the acquisition method, the results of subsidiary companies acquired or disposed of during the year are included in the consolidated income statement from the date on which control is transferred to the Group and are no longer consolidated from the date control ceases.

Goodwill or reserve on consolidation represents the difference between the acquisition cost of shares in the subsidiary companies and the fair value of attributable net assets acquired at the date of acquisition. Reserve on consolidation (net of goodwill arising on consolidation) is retained in the consolidated financial statements.

The gain or loss on disposal of a subsidiary company is the difference between the net disposal proceeds and the Group's share of its net assets together with any unamortised balance of goodwill on acquisition and exchange differences.

All significant inter-company transactions are eliminated on consolidation and the consolidated financial statements reflect external transactions only.

(ii) *Associated Companies*

The Group's investment in associated companies is stated at cost less impairment losses, if any. Investment in associated companies are accounted for in the consolidated financial statements using the equity method. The Group's interests in associated companies are stated at cost plus adjustments to reflect changes in the Group's share of profits and losses in the associated companies.

Goodwill or negative goodwill arising on acquisition represents the difference between the cost of investment and the Group's share of the value of net assets of the associated companies at the date of acquisition.

The Group's share of results and reserves in the associated companies acquired or disposed of are included in the consolidated financial statements from the effective date of acquisition or up to the effective date of disposal.

(iii) *Other Investments*

Investments in other non-current investments are stated at cost and an allowance for diminution is made where, in the opinion of the Directors, there is a decline other than temporary, in the value of such investments. Where there has been a decline other than temporary in the value of an investment, such a decline is recognised as an expense in the period in which the decline is identified.

d) Property, Plant and Equipment

The gross carrying amounts of property, plant and equipment are initially measured at cost. Land and buildings which have been subsequently revalued, are stated at valuation less accumulated depreciation and impairment losses, if any. All other property, plant and equipment are stated at cost less accumulated depreciation and impairment losses, if any.

Land and buildings are revalued at a regular interval of at least once in every five years.

Surplus arising from such valuations is credited to shareholders' equity as a revaluation surplus and any subsequent deficit is charged against such surplus to the extent that the decrease offsets any increase. In all other cases, the deficit will be charged to the income statement.

NOTES TO THE FINANCIAL STATEMENTS (Cont'd)

FOR THE YEAR ENDED 31 DECEMBER 2002

Freehold land is not depreciated. Depreciation on other property, plant and equipment is calculated to write off the costs of the assets on a straight line basis over their estimated useful lives. The principal annual depreciation rates are as follows:-

	Rate %
Leasehold land and freehold buildings	1 - 2
Electrical fittings	5 - 10
Motor vehicles	10 - 25
Furniture & fittings, tools, office & store equipment	5 - 20
Laboratory, demo equipment, R & D equipment and machinery	10
Renovation	10 - 20

No depreciation is provided for on site equipment in progress as it is still under commissioning and it is expected to be completed in the next financial year end.

Property, plant and equipment are written down to recoverable amount if, the recoverable amount is less than their carrying value. Recoverable amount is the higher of an asset's net selling price and its value in use.

e) Impairment of Assets

The carrying amount of the Group's and Company's assets and inventories are reviewed at each balance sheet date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated and an impairment loss is recognised whenever the recoverable amount is less than the carrying amount of the asset. The impairment loss is recognised in the income statement immediately except for the impairment on a revalued asset where the impairment loss is recognised directly against the revaluation surplus account to the extent of the surplus credited from the previous revaluation for the same assets with the excess of the impairment loss charged to the income statement. All reversals of an impairment loss are recognised as income immediately in the income statement except for the reversal of an impairment loss on a revalued assets where the reversal of the impairment loss is treated as a revaluation increase and credited to the revaluation surplus account of the same asset.

f) Inventories

Inventories comprising raw materials, finished goods and laboratory supplies are valued at the lower of cost and net realisable value after making due allowance for any obsolete or slow-moving items.

Cost is determined on a first-in-first-out basis and comprise purchase price plus cost incurred in bringing the inventories to present location.

g) Foreign Currencies

Transactions in foreign currencies are recorded in Malaysian Ringgit at rates of exchange ruling at transaction dates. Outstanding balances as at the financial year end are reported at rates then ruling, unless hedged by forward foreign exchange contracts, in which case the rates specified in such forward contracts are used. Exchange differences arising therefrom are charged or credited to the income statement.

h) Deferred Tax Liabilities and Assets

Deferred tax liabilities and assets are provided for under the liability method at the current tax rate in respect of all temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base including unused tax losses and capital allowance.

A deferred tax asset is recognised only to the extent that is probable that taxable profit will be available against which the deductible temporary differences can be utilised. The carrying amount of a deferred tax asset is reviewed at each balance sheet date. If it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred tax asset to be utilised, the carrying amount of the deferred tax asset will be reduced accordingly. When it becomes probable that sufficient taxable profit will be available, such reductions will be reversed to the extent of the taxable profit.

Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of financial charges, are included in borrowings. The interest element of the finance charge is charged to the income statement over the lease period.

Property, plant and equipment acquired under finance lease contracts is depreciated over the useful life of the asset in line with the Group's accounting policy for property, plant and equipment. If there is no reasonable certainty that the ownership will be transferred to the Group, the asset is depreciated over the shorter of the lease term and its useful life.

k) Amount Due from/to Contract Customers

- i) Costs directly related to the contract;
- ii) Costs attributable to contract activity in general and can be allocated to the contract; and
- iii) Other costs specifically chargeable to the customers under the terms of the contract.

Where progress billings exceed cost incurred plus attributable profit less foreseeable losses, the net credit balance on all such contracts is shown in other payables as amounts due to contract customers.

q) Financial Instruments

Financial instruments carried on the balance sheet include cash and bank balances, investments, receivables, payables and borrowings. The particular recognition methods adopted are disclosed in the individual accounting policy statements associated with each item.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument classified as liability are reported as expense or income. Distributions to holders of financial instruments classified as equity are charged directly to equity. Financial instruments are offset when the Group has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

r) Segmental Information

Segment revenues and expense are those directly attributable to the segments and include any joint revenue and expenses where a reasonable basis of allocation exists. Segments assets include all assets used by a segment and consist principally of cash, receivables, inventories, intangibles and property, plant and equipment, net of allowances and accumulated depreciation and amortisation. Most segment assets can be directly attributed to the segments on a reasonable basis. Segment assets and liabilities do not include income tax assets and liabilities respectively.
